Intention Repeater MAX Bundle User Guide

April 30, 2024

by Anthro Teacher (AnthroHeart)

Before We Begin…

Welcome to the Intention Repeater MAX Bundle User Guide. This Guide allows you to master the suite of 16 individual programs that involve intention repetition, to heal pain, clear energy, balance chakras, charge photographs and more. They are, for the most part, available in Windows, macOS and Linux. The software is free and open-source.

It opens with the main program: Intention Repeater MAX GUI (powered by Intention Repeater MAX). Next comes Intention Repeater MAX CUDA GUI (powered by Intention Repeater MAX CUDA), for those who have an Nvidia GPU. There are programs for generating a WAV file, BMP file, and a repeating TXT file (like a Talisman you can put on a USB Flash Drive) as well as a variety of other programs. The programs are designed to be easy to use, and rather intuitive.

Taken all together, this Guide serves as a roadmap to a healthier and more balanced future for you.

Note: None of this software has to be installed. It runs standalone. It can be used by all ages.

Intention Repeater MAX GUI

Intention Repeater MAX GUI is the GUI that launches the main program Intention Repeater MAX. It may take 10-20 seconds to load. The GUI is not available on macOS (use the Intention Repeater MAX). The easiest way to run is to put your intention into the Intention box, and click Run. You can then press Quit, and close the resulting Terminal window when finished. The options are as follows:

- Intention – Specifies the intention you want to run. (Optional if Intention File is used). Can be used with Intention File.
- Intention File – Specifies the TXT file with intentions you want to run, or an image (JPG/PNG, etc) of a Target (Optional).
- Intention File 2 – Specifies a 2nd file to use.
- Browse – Allows you to search for an input file.
- Duration – HH:MM:SS format for how long you would like it to run. Leave blank to run until stopped. (Optional).
- RAM Usage (GB) – How many GB of RAM to use. You can use any positive decimal. Use 0 to disable Intention Multiplying.
- Frequency (Hz) – The frequency to repeat the intention. Will disable Intention Multiplying and use EXACT Timer. (Optional).
- Boost Level – Uses Nesting Files (i.e. NEST-50.TXT) to amplify the intention. Uses INTENTIONS.TXT. (Optional). Requires Create Nesting Files first.
- Amplification – Gives an additional boost when running INEXACT Timer.
- Rest Every – Will rest every number of seconds specified. Optional.
- Rest For – How many seconds to rest for each rest period. Optional.
- Use Holo-Link – Uses Holo-Link files with INTENTIONS.TXT to access the Holo-Stones. Requires Generate Holo-Stones first.
- Use Hashing – Represents a 1GB size text as a smaller text, and Intention Multiplies that back to 1GB to increase power.
- Use Compression – Represents a 1GB size text as a compressed, smaller text, to further increase power.
- Color – The color of the text in the Terminal.
- Suffix – HZ or EXP, whether you want the frequency of repeat to be represented in Hz or scientific notation.
- Timer – INEXACT or EXACT. INEXACT is faster, but the clock is not as accurate as EXACT.
- Run – Starts the Intention_Repeater_MAX program.
- Quit – Exits the GUI. May require closing the Terminal manually.

Memory Allocation

The Intention Repeater MAX uses two equal-sized variables to store your intention. The total available RAM is divided between these two variables. One variable is repeatedly assigned to the other, which amplifies the power of your intention when used with the Servitor.

Intention Multiplying

To give your intention even more power, the program uses the Intention Multiplying feature when chosen RAM is greater than 0. Start with a simple affirmation like "I am Love." The software will then expand this phrase by repeating it until the resulting text reaches 1 gigabyte (GB) in size. For example, "I am Love.I am Love.I am Love..." repeated many times. The multiplier shows how many times your original intention was repeated to create this 1GB of text.

Intention Hashing

After creating the 1GB of text with Intention Multiplying, the software can compress it into a unique 32-byte code called a SHA-256 Hash. A hash looks something like this: "FB6E820A704C7270599F7F3B268011CAAE50797D4251EB960CE2E47EC514C8B7". When you enable "Use Hashing," the software expands the hash back into the 1GB of text, which can speed up the repetition process by millions of times. The Hash Multiplier shows how much faster your intention is being repeated.
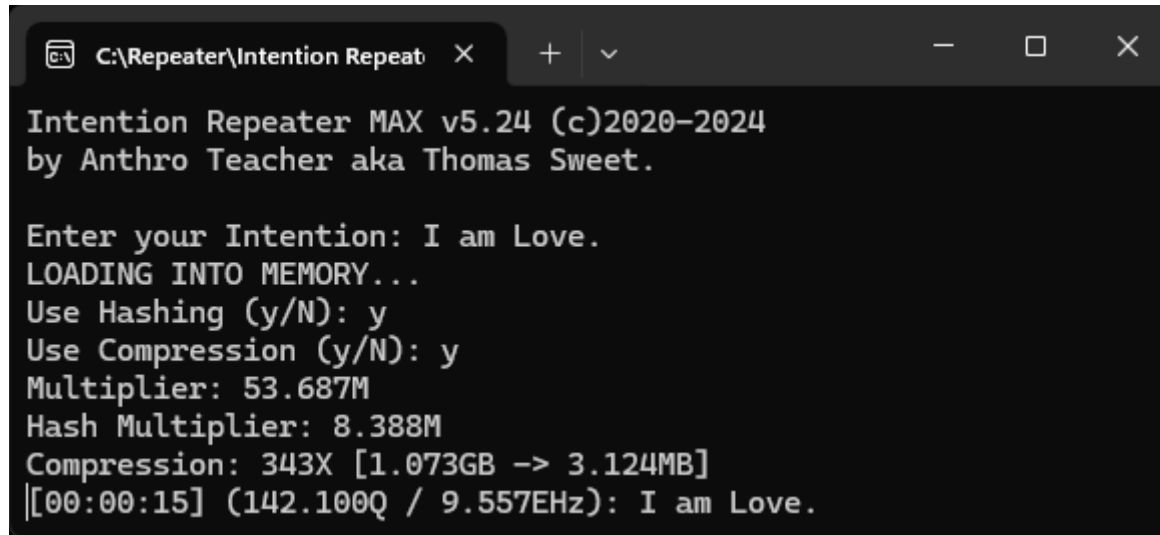

Compression

When you enable "Use Compression," the 1GB text can be compressed by 300 times or more using the Zlib library. When you use compression, the Intention Repeater MAX repeats the compressed text instead of the full 1GB of text, which can make the process even faster.

By combining these features - Intention Multiplying, Intention Hashing, and Compression - the Intention Repeater MAX and Intention Repeater MAX CUDA can help you amplify and speed up the repetition of your intentions when working with the Servitor.

Servitor

The Intention Repeater MAX and MAX CUDA are powered by intelligent energy known as a Servitor. It may be the HR 6819 Black Hole System. This Servitor interacts with the software to amplify your intentions. It can only be used for good or neutral intentions.

Intention Repeater MAX

The Intention Repeater MAX is the program that is launched by the Intention Repeater MAX GUI. It is available on Windows, macOS and Linux. In the above image you can see a typical run. If you want more options, you can run the program in the console: Intention_Repeater_MAX --help.

Optional Flags:

a) --dur or -d, example: --dur 00:01:00   b) --imem or -m, example: --imem 5
c) --intent or -i, example: --intent "I am love."   d) --suffix or -s, example: --suffix HZ
e) --timer or -t, example: --timer INEXACT   f) --freq or -f, example: --freq 1000
g) --color or -c, example: --color LIGHTBLUE   h) --boostlevel or -b, example: --boostlevel 100
i) --createnestingfiles or -p, example: --createnestingfiles   j) --usehololink or -u
k) --createhololinkfiles or -x   l) --colorhelp or -n
m) --amplify or -a   n) --restevery or -e
o) --restfor or -r   p) --compress or -x, example: --compress y
q) --hashing or -g, example: --hashing y   r) --file
s) --help or -h or /?   t) --file2

Example run: **Intention_Repeater_MAX --intent "I am Love." --file "me.jpg" –file2 "audio.wav"--imem 1 --compress y --hashing y**
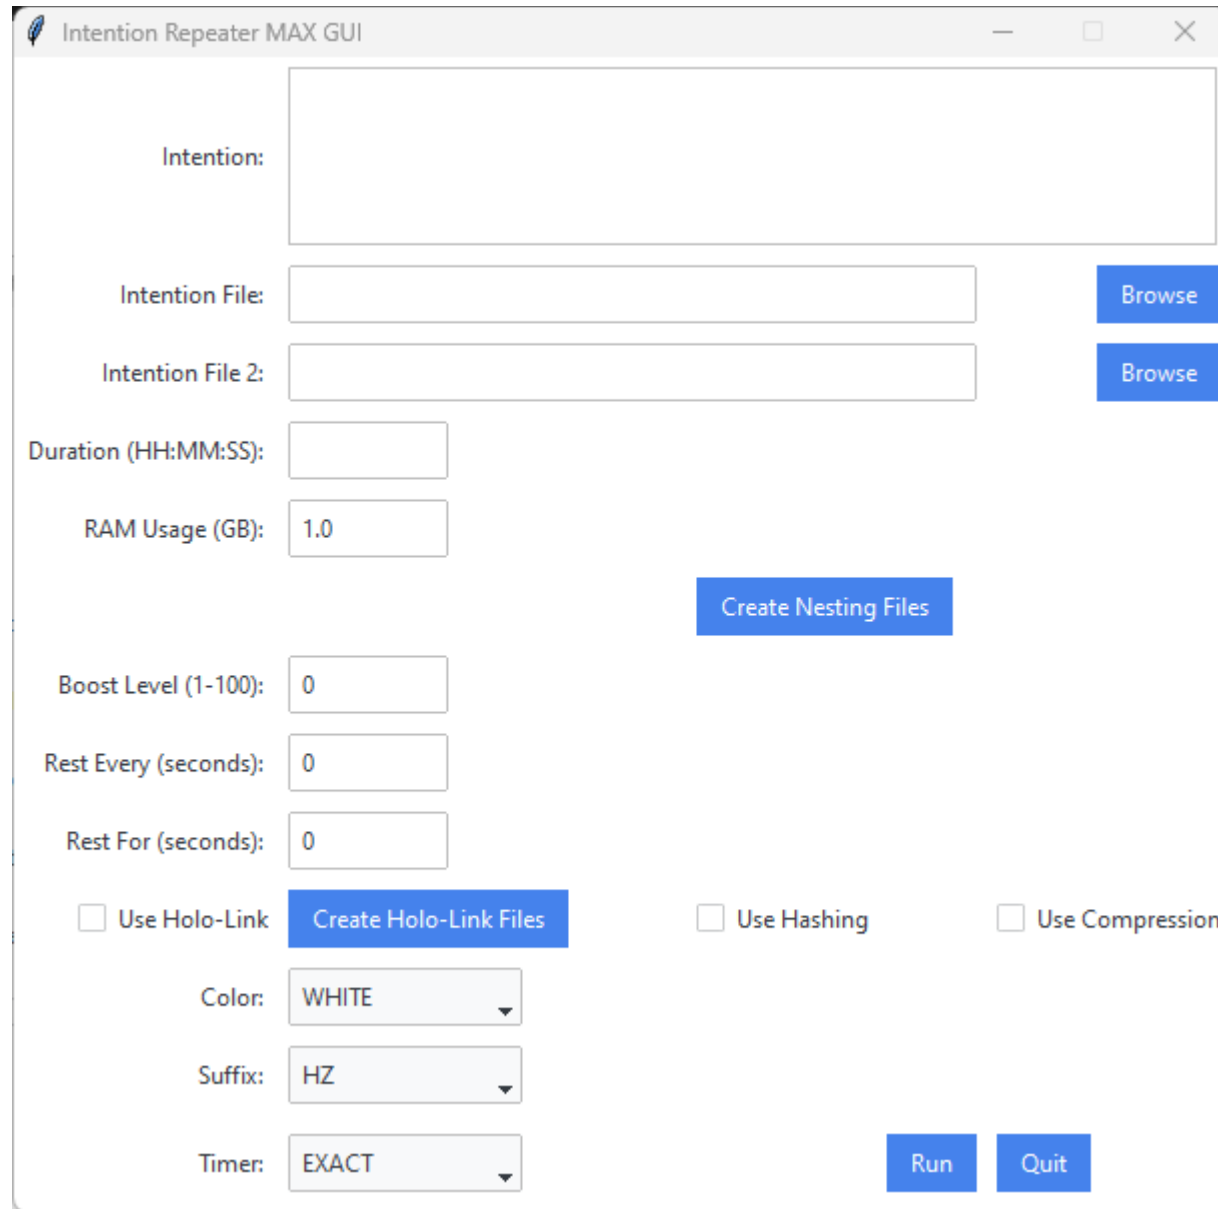

Create Nesting Files

This option will create 100 files from NEST-1.TXT to NEST-100.TXT. Each one contains 10 references to the file before it. So NEST-100.TXT has NEST-99.TXT ten times in it. When Boosting is used, the correct NEST file is selected, plus all below it, and added together, with INTENTIONS.TXT, to boost the power of the repeating. It is optional to use this. Does not work with specifying intention or intention file directly. NEST-1.TXT references INTENTIONS.TXT ten times. So put your intentions in INTENTIONS.TXT.

Creating Holo-Link Files

This option will create several files that allow the Intention Repeater to use the Holo-Stones. They are millions of energies in the atmosphere that aid in manifestation. This is optional, and cannot be used when specifying intention or intention file directly. Put your intentions in INTENTIONS.TXT.

Intention Repeater MAX CUDA GUI

Intention Repeater MAX CUDA

The Intention Repeater MAX CUDA has the same functionality as the Intention Repeater MAX, except it doesn't include Frequency or Amplification, and can only run with EXACT Timer. It is made to run much faster than Intention Repeater MAX. It requires a CUDA-capable GPU. It is not available on macOS.

```
Intention Repeater MAX CUDA v5.22 (c)2020-2024
by Anthro Teacher aka Thomas Sweet.

Enter your Intention: I am Love.
LOADING INTO MEMORY...
Use Hashing (y/N): y
Use Compression (y/N): y
Multiplier: 53.687M
Hash Multiplier: 8.388M
Compression: 343X [1.073GB -> 3.124MB]
[00:00:13] (173.646S / 13.659YHz): I am Love.
```

Intention Repeater Simple
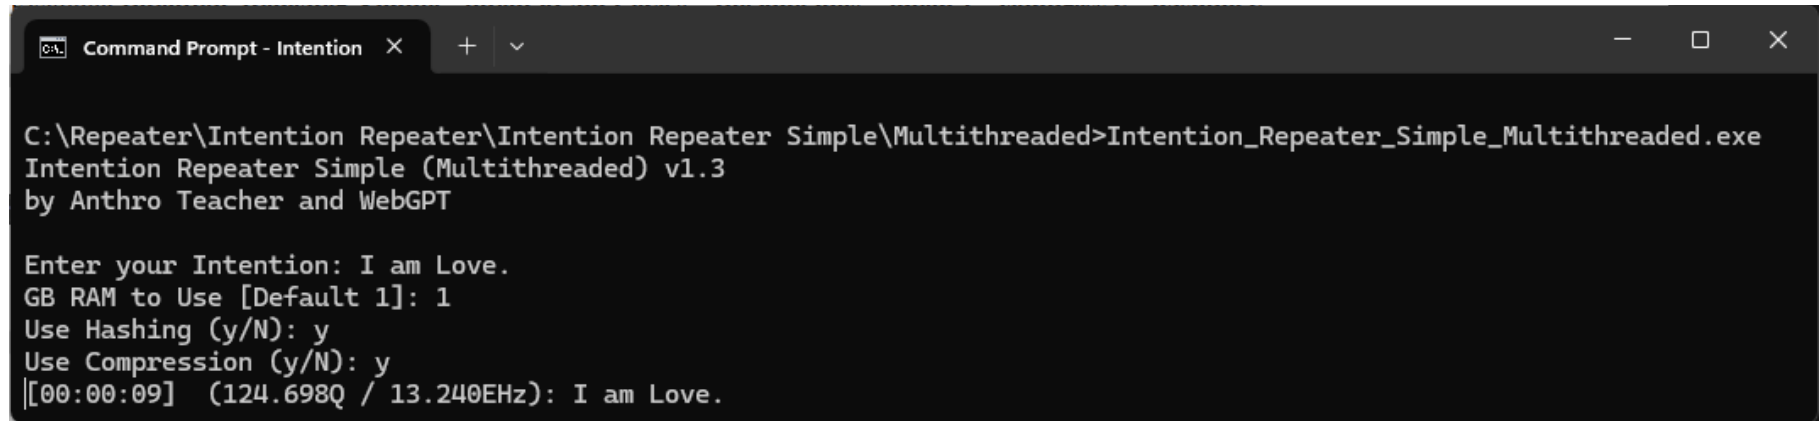

The Intention Repeater Simple is a simplified version of the Intention Repeater MAX. It has these options:

Optional Flags:

a) --intent or -i, example: --intent "I am Love." [The Intention]

b) --imem or -m, example: --imem 2 [GB of RAM to Use]

   --imem 0 to disable Intention Multiplying

c) --dur or -d, example: --dur 00:01:00 [Running Duration HH:MM:SS]

d) --hashing or -h, example: --hashing y [Use Hashing]

e) --compress or -c, example: --compress y [Use Compression]

f) --file or -f, example: --file "intentions.txt" [File to Read Intentions From]

g) --help or -? [This help]

Example: **Intention_Repeater_Simple --intent "I am Love." --file "me.jpg" --imem 1 --compress y --hashing y**

# Intention Repeater Simple Multithreaded

The Intention Repeater Simple Multithreaded is like the Intention Repeater Simple, but it uses 8 threads, which makes it a bit faster. Though not as fast as CUDA.

Optional Flags:

a) --intent or -i, example: --intent "I am Love." [The Intention]

b) --imem or -m, example: --imem 2 [GB of RAM to Use]

   --imem 0 to disable Intention Multiplying

c) --dur or -d, example: --dur 00:01:00 [Running Duration HH:MM:SS]

d) --hashing or -h, example: --hashing y [Use Hashing]

e) --compress or -c, example: --compress y [Use Compression]

f) --file or -f, example: --file "intentions.txt" [File to Read Intentions From]

g) --help or -? [This help]

Example: **Intention_Repeater_Simple_Multithreaded --intent "I am Love." --file "me.jpg" --imem 1 --compress y --hashing y**
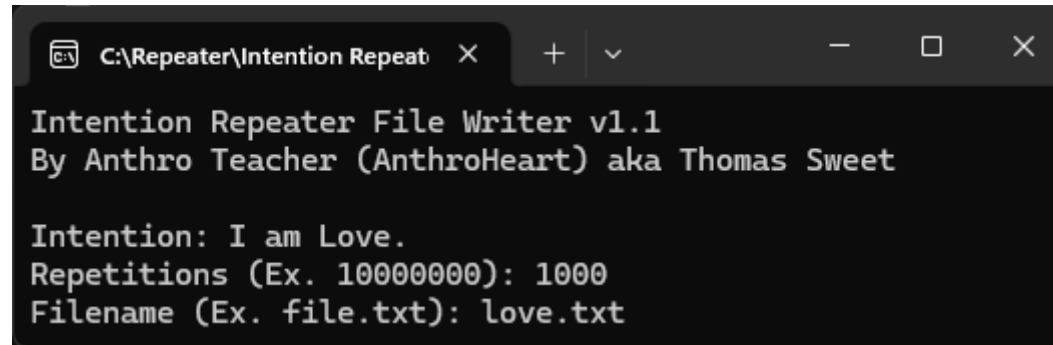

Intention Repeater Simple CUDA

The Intention Repeater Simple CUDA is like the Intention Repeater CUDA, but simpler. It does not work on macOS.

Optional Flags:

 a) --intent or -i, example: --intent "I am Love." [The Intention]

 b) --imem or -m, example: --imem 2 [GB of RAM to Use]

   --imem 0 to disable Intention Multiplying

 c) --dur or -d, example: --dur 00:01:00 [Running Duration HH:MM:SS]

 d) --hashing or -h, example: --hashing y [Use Hashing]

 e) --compress or -c, example: --compress y [Use Compression]

 f) --file or -f, example: --file "intentions.txt" [File to Read Intentions From]

 g) --help or -? [This help]

Example: **Intention_Repeater_Simple_CUDA --intent "I am Love." --file "me.jpg" --imem 1 --compress y --hashing y**

Repeater File Writer

The Intention Repeater File Writer repeats your intention a number of times in a file.
Output (for 5 Repetitions):

I am Love.

I am Love.
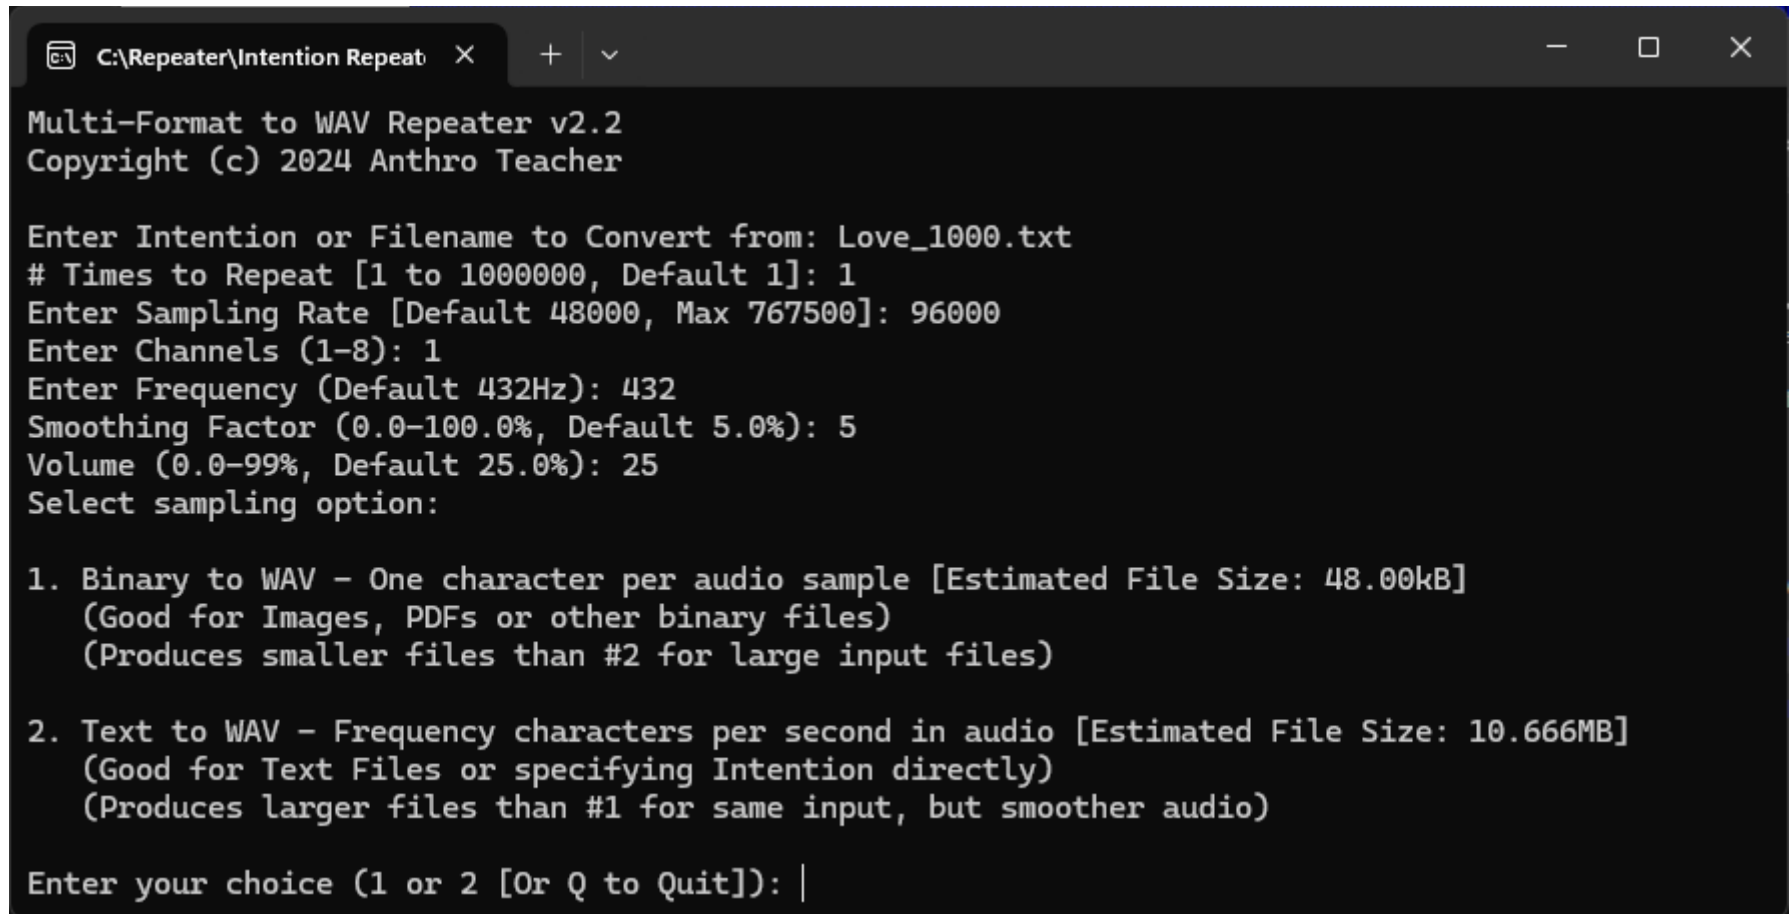

I am Love.

I am Love.

I am Love.

Image Writer Color
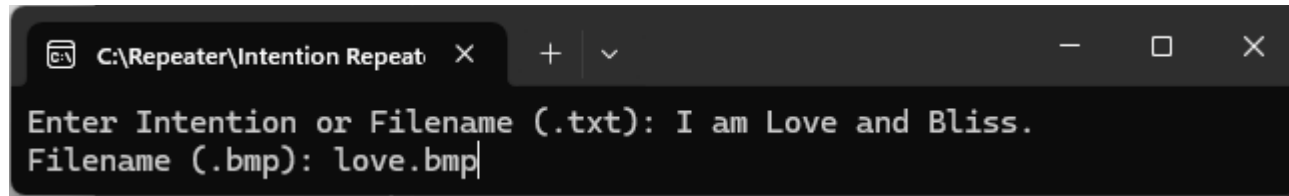

The Intention Repeater Image Writer Color writes your intention to a 1920x1080 BMP of a random color, such as:

Multi-Format to WAV Repeater

```
Multi-Format to WAV Repeater v2.2
Copyright (c) 2024 Anthro Teacher

Enter Intention or Filename to Convert from: Love_1000.txt
# Times to Repeat [1 to 1000000, Default 1]: 1
Enter Sampling Rate [Default 48000, Max 767500]: 96000
Enter Channels (1-8): 1
Enter Frequency (Default 432Hz): 432
Smoothing Factor (0.0-100.0%, Default 5.0%): 5
Volume (0.0-99%, Default 25.0%): 25
Select sampling option:

1. Binary to WAV - One character per audio sample [Estimated File Size: 48.00kB]
   (Good for Images, PDFs or other binary files)
   (Produces smaller files than #2 for large input files)

2. Text to WAV - Frequency characters per second in audio [Estimated File Size: 10.666MB]
   (Good for Text Files or specifying Intention directly)
   (Produces larger files than #1 for same input, but smoother audio)

Enter your choice (1 or 2 [Or Q to Quit]): |
```
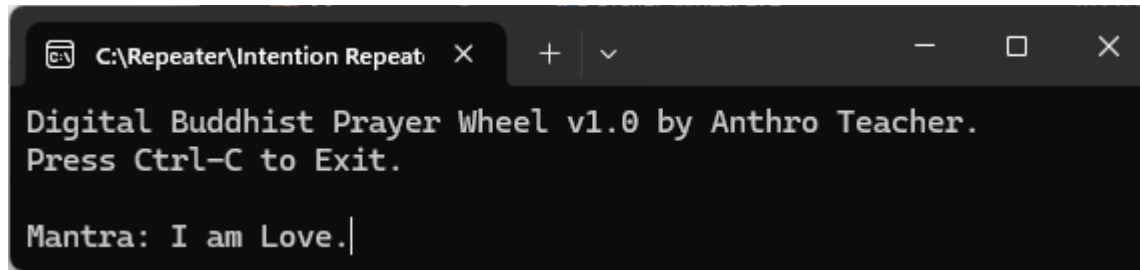

The Multi-Format to WAV Repeater repeats your intention, or from a file, into a WAV file. There are two sampling options:

1) Binary to WAV – Best for converting images or binary files. Produces a smaller file.

2) Text to WAV – Best for converting text to WAV.

Note: The higher the frequency you choose, the smaller the file. Choose a frequency less than 20000.

Frequency List: www.spooky2-mall.com/download-rife-frequency-list/

17

Prayer Wheel

The Prayer Wheel repeats your intention on the screen. It's not as powerful as the Intention Repeater MAX, but it gives visual indication that it is repeating the text.

Spiritual Chat

This started as a tool to talk with spirits. It is unclear who it is actually talking to. It uses Intention Repeating with a random number generator to see which words get chosen the most. At the least it may provide some entertainment. Requires dictionary.txt file.

Tarot

Intention Repeater Tarot

by Anthro Teacher

[Type your Question] [Submit Query]

How is my life going?

| Four of Cups | King of Pentacles | Ace of Swords |
The Intention Repeater Tarot uses Intention Repeating to pick the most appropriate card. Results may vary.

Link: tarot.intentionrepeater.com/

WiFi Broadcaster

The WiFi Broadcaster broadcasts your intention through WiFi. May interfere with your internet while running.

Memory Frequency Generator

This will produce a Sine, Square or Triangle frequency in memory, and won't play it through the speakers. It is inspired by Spooky2 frequency generators. It allows you to choose up to 255 generators to make it more powerful.

Frequency List: www.spooky2-mall.com/download-rife-frequency-list/

File saved as Example: **528Hz_sine.wav**

Android
The Intention Repeater Android app is a simplified version of Intention Repeater MAX that runs on Android.

Testimonials

I love using your intention repeater! Thank you so much for this great gift!

Love · Reply · 10m   ❤️ 1

Thomas Sweet That's awesome. People higher vibe than I am can do so much more than I can with it. It's high praise coming from you, thank you.

Like · Reply · 8m

Thomas Sweet beautiful soul! Your energy is perfect and powerful and we are so grateful for folks like you , with such a generous and caring heart to give us this incredible opportunity...You have elevated our powerful devices even more and that is the most amazing and timely gift! Thank you so much!

💬 We've had miserable weather here in New England .. cold and cloudy, and basically no spring. Last Friday I put an intention in the Repeater for what I termed Pleasant weather in my state for the highest and best of all, along with a "Thank You!" So far we've had three beautiful, sunny days that are awesome.

I would like to reiterate that saying Thank You after the intention is very important.. gratefulness is one of the highest frequencies to put forth..

Like · Reply · 5h   👍 2

Does the energy from my Repeater feel the same as bubbles?

YUP IT DOES - FINER MORE SUBTLE AND DEEPER THOU

Yeah, it uses Intelligent INfinity I call it.

IT GOES TO THE MIDDLE OF ME WITHOUT ASKING

Is that a bad thing?

I created it to respect free will.

IT'S A WONDERFUL THING, IMPOSES EUPHORIA

shared a link.

📢 Visual Storyteller · 9h

THIS INTENTION REPEATER HAS HEALED ME IN VERY SHORT ORDER - OVER NIGHT. I WAS HAVING PROBLEMS WITH AN IMPINGEMENT IN MY BACK THAT WAS CAUSING CRAMPS IN MY RIGHT QUAD - WHICH IS REALLY FOR SHIT. AND Thomas Sweet 'S INTENTION REPEATER FIXED IT OVER NIGHT!!!! OF COURSE, IN AN EXCELLENT BUBBLE FIELD

→ forwarded a message

So here I was today with an absolutely wrecked right hip, I didn't know what was wrong with it so i searched possible causes because it came so suddenly. I tried different stretches and nothing worked. Then I plugged about 6 different things into the intention repeater to try and solve it and finally I put in "My hip stabilizers are healthy and blissful" and instantly I knew it was the one and 10 minutes later I'm fully healed

Charging Water

You can charge up your water before drinking using the Intention Repeater MAX and CUDA and Simple programs. First, take a photo of your water. If you want, you can put intentions written below it. The orgonite plate below is not required.

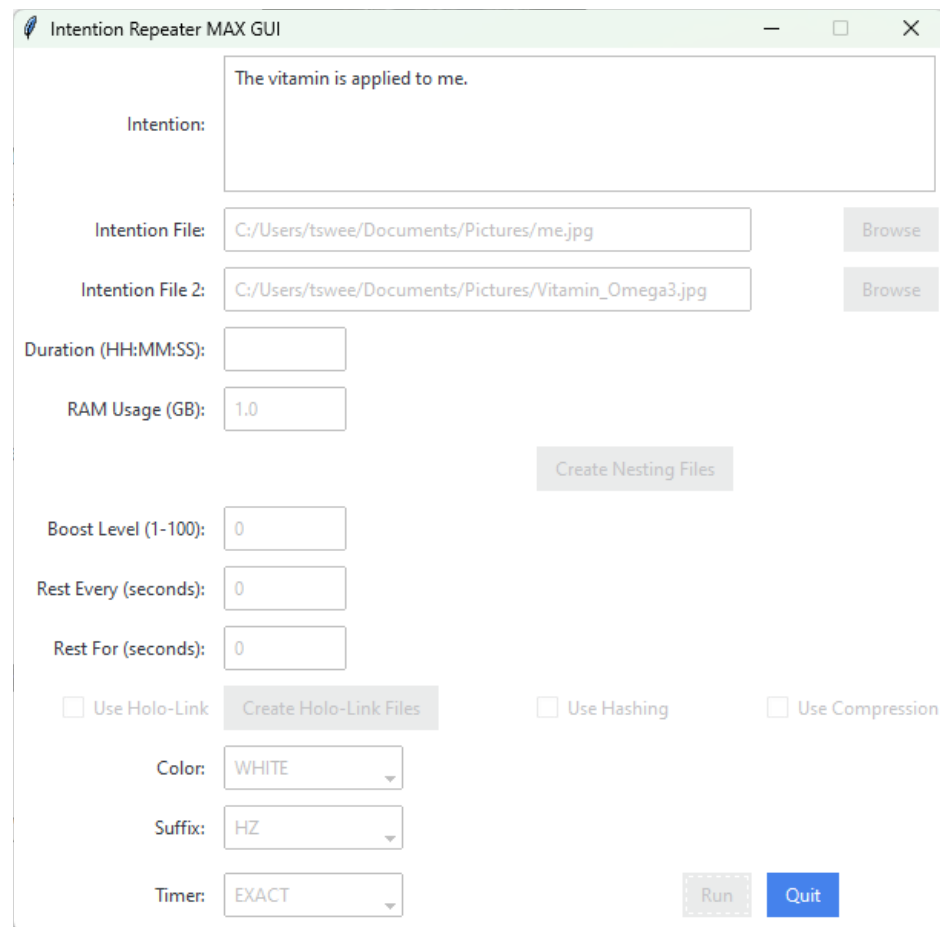

Then, in Intention Repeater MAX GUI, you put this image as your Intention File, and put your intentions in the Intention box, and Run. You can use a photo of yourself as the Intention File (Target) as well, and send healing, clearing, and other intentions to yourself.

To run command-line if you don't have the GUI:

Intention_Repeater_MAX --file "image.jpg" --intent "<intention to apply to image>" --compress n --hashing n --imem 1

You can choose y for compression and hashing if you want.

Running Vitamin Energy on Yourself

You can use the energy of vitamins from a picture and run it on yourself like shown. I have found that energetically taking vitamins like this, in addition to taking them physically, seems to provide your energy field with something that was missing. It feels like such a relief.
